

Assignment :- 1

Title:- farmer seeds buying app.

Executive Summary:- The farmer Seeds Buying App is a user-friendly, digital platform designed to streamline the process of purchasing agricultural seeds for farmers. The ultimate goal is to modernize the traditional seed buying process, making it more accessible and convenient for farmers, especially those in rural areas.

Project Description:- The farmer Seeds buying App will be a mobile application that allows farmers to browse, compare and purchase a variety of seeds directly from verified suppliers. The app will feature a comprehensive database of seed varieties, including descriptions, pricing, user reviews, and expert recommendations. The app will also include features such as order tracking, delivery scheduling, and customer support. It will support multiple payment methods, mobile money, bank transfers, and cash on delivery. The app will be available in multiple languages to cater to a diverse user base.

Project scope :-

- App development :- The app will be developed for both Android and iOS platform to ensure wide accessibility.
- Seed catalog with detailed features :-
 - ① Seed catalog with detailed information
 - ② Search and filter options
 - ③ Order tracking and management.
 - ④ Multilingual support.
 - ⑤ Push notifications for updates and promotions.

This project is expected to significantly enhance the accessibility and convenience of seed purchasing for farmers, ultimately outcomes and increased productivity.
